**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

2. Acknowledgment is made of receipt of applicant's Information Disclosure Statement (PTO-1449) filed December 31, 2003.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tottori (US 2002/0014680).

Tottori teaches a semiconductor device, comprising (Fig.6):

fuse terminal (4) provided on a chip substrate surface; and a chip terminal (discharge contribution terminal, 16) which is provided at the upper side on said chip substrate surface and of which the height from said chip substrate surface to the top face is higher than the height of the top face of said fuse terminals.

***Allowable Subject Matter***

5. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Prior art reference, taken along or in combination, do not teach or render obvious that the discharge contribution terminal is a dummy terminal which is disposed so as to surround the fuse terminals.

***Conclusion***
